Do you think molestation exists in public vehicles ? (for male and female both)

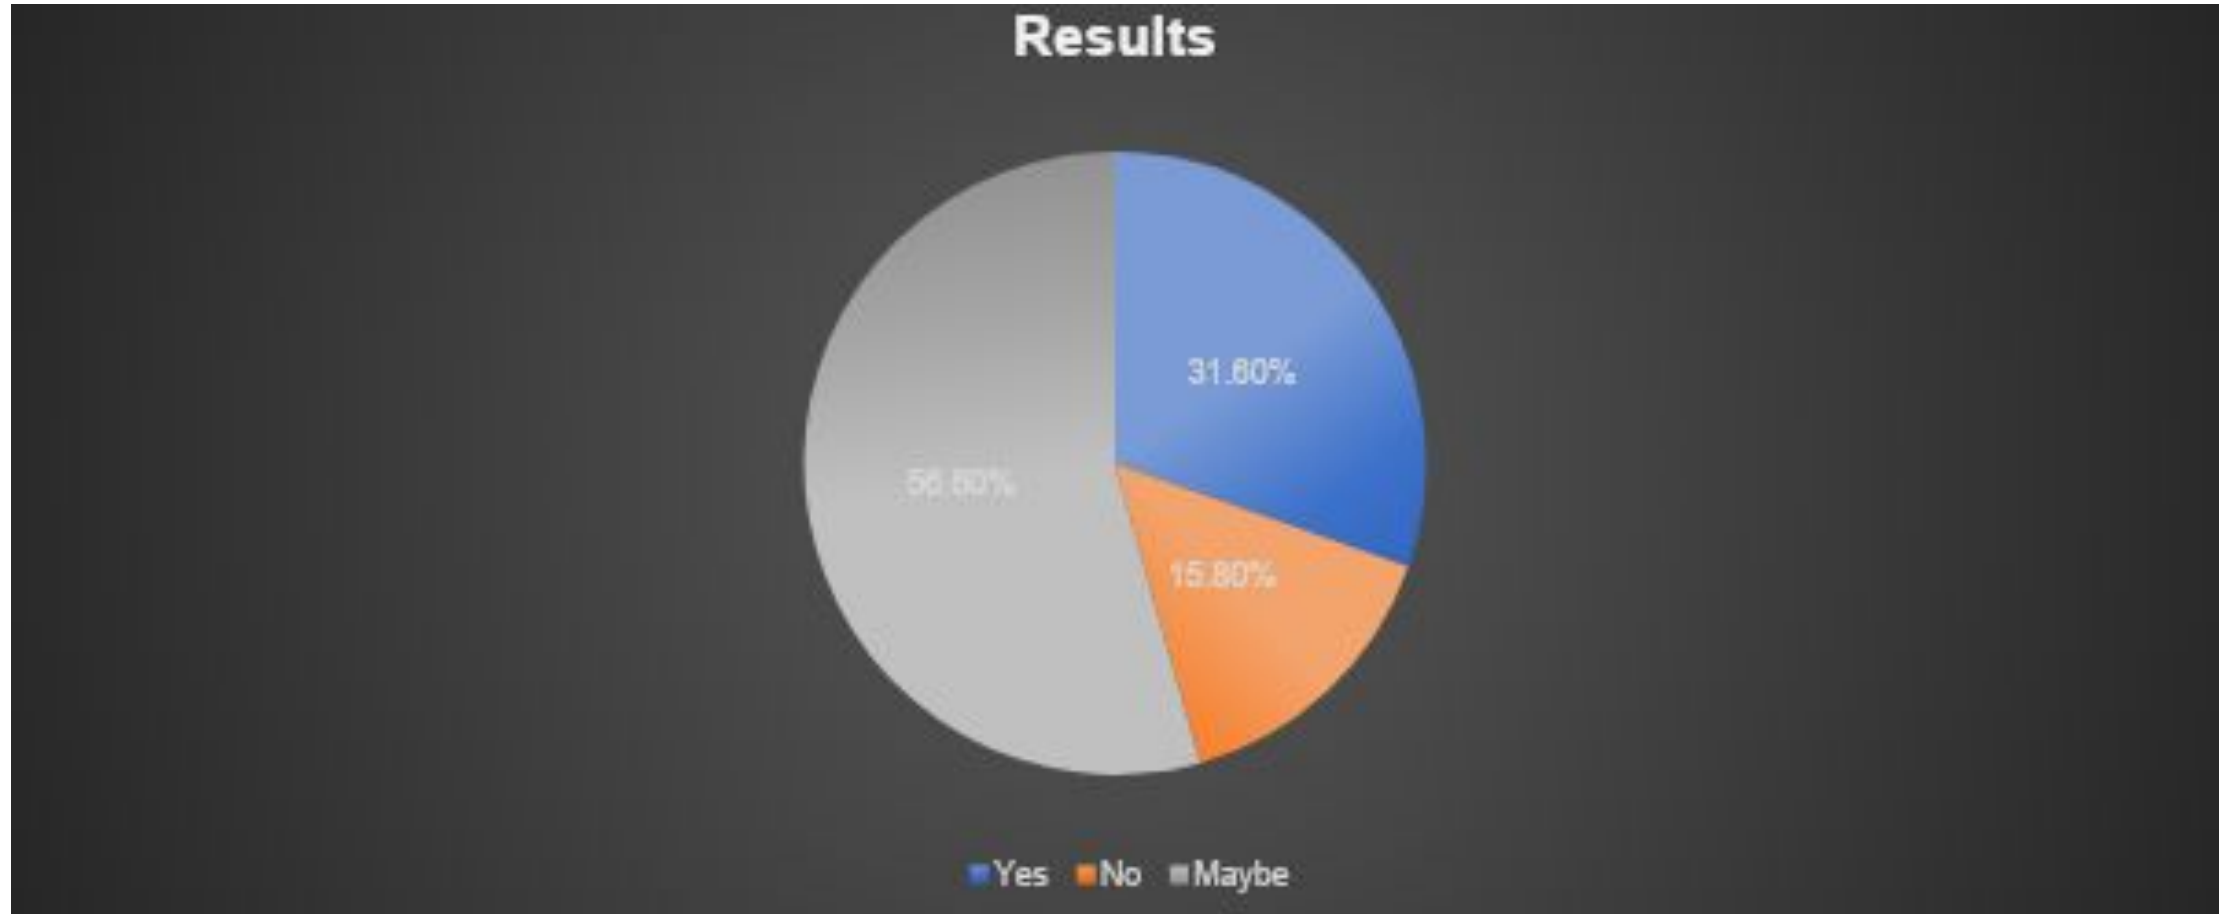

Do you think our society pressurize boys to be masculine?(force them to be emotionally stable)

Do you think a dominant male is biggest reason for rape in our society?

Do you think the females play victim card on males of our society? (eg. fake accusation of crimes like rape, harassment, etc)

Solutions for equality between men and women

- As someone who's been trying to find the root cause of gender inequality in today's context, I believe the only way to eradicate this is taking major steps starting from their own family. The fathers play a major role in this. Division of works should be done equally. And the offspring should also be taught the same.
- Path of equity to reach equality in every sector i guess.
- Awareness can be a way. One's must encourage women's participation in different level as government has seperated a compulsory quota for womens.
- The trend of respecting human regardless gender should be established

Solutions for acceptance of LGBTQ community in our society

- Let's have an open talk about LGBTQ and make them comfortable in daily life.
- The society needs to acknowledge that a person of LGBTQ regardless of their sexuality is foremost a human being. Society needs to be aware of the fact that having different sexual preference or behaviour is okay.
- People should be made aware about the LGBTQIA+ family. They should be taught about the importance of acceptance and the fact that LGBTQ+ people mean no harm regardless of what is said outside.

Solutions for LGBTQ Community

- **Some of the rights are already in the constitution but hasn't been implemented. So, it should be implemented.**
- **The old school thought of all LGBTQ people are bad and are sex workers must be vanished soon.**
- **Job opportunities for LGBTQ people so LGBTQ people shouldn't do sex works.**
